

My name is Marc Dietz and I manage a small market station in Ozark, AR. I would like to encourage you to carefully consider the burden that a recording requirement would put on our type radio station. We operated by family in order to keep costs low, it is very difficult when requirements are made involving equipment purchases to pay these, especially in markets that for the most part are not getting any larger, and therefore income doesn't increase. While I do appreciate the work you are doing on the monitoring of on-air activities I would like to encourage you to consider other avenues that would not involve us having to purchase equipment. Thank you Marc Dietz KDYN radio.
